

Global Tenant

GT MAIL Ultimate DefenseSM Pricing

The Global Tenant Email Defense Service offers far more than traditional spam prevention, by providing complete email defense using a combination of proven spam filters, leading anti-virus engines, fraud protection, content filtering, and email attack protection. Our network perimeter-based service identifies, quarantines, blocks and strips suspect email messages *before* they can enter or leave your organization's messaging infrastructure.

GT MAIL Ultimate DefenseSM Starting from \$2.25 per user per month

This is Global Tenant's most comprehensive package of protection that includes precise spam blocking, virus and worm scanning, sophisticated filtering of unwanted and malicious content and attachments for inbound email, and unique email infrastructure protection that conceals your messaging network, protecting you from denial of service attacks, email bombs and other harmful email attacks.

This package also includes outbound message filtering, which is ideal for organizations looking to protect the integrity of information leaving the corporate network, an advanced administrative and reporting portal, and sophisticated end-user and administrator quarantine management. And, with the Global Tenant Fail Safe Disaster Recovery Service, this package is perfect for those organizations that cannot afford to ever lose an email.

GT MAIL Ultimate Defense Features

With the complete GT MAIL Ultimate Defense package, your business will benefit from the following Global Tenant Email Defense Service features:

Advanced Spam Blocking – Eliminates 90 percent of spam costs by blocking 98 percent of spam using our patent-pending Stacked Classification Framework[®] spam detection system that combines the most effective spam-fighting filters and techniques in the industry, including award-winning Symantec Brightmail AntiSpam[™] technology. This multi-layered framework separately assesses and "votes" on the probability that an email is spam. Because each filtering method has unique strengths designed to identify specific threats, the combination creates one of the most accurate and comprehensive filtering processes in the industry.

Triple Virus and Worm Scanning – Provides your organization with triple virus protection – combining Global Tenant's proprietary worm detection technology, which identifies and intercepts zero-hour mass mailing worms *before* they enter or leave a corporate network, with industry-leading signature-based anti-virus engines.

Email Attack Protection – Conceals your network and critical messaging gateways from attack. Instantly blocks denial of service and other SMTP-based attacks, including dictionary harvest attacks, email bombs and channel flooding.

Fraud Protection – Keeps your employees safe from the risks of fraud and phishing scams.

Content and Attachment Filtering – Reduces corporate liability and risk through intelligent message processing that identifies, quarantines and blocks unwanted, malicious and sensitive content and attachments.

Outbound Message Filtering – Proactively protects your clients from harmful viruses and worms, and enforces your corporate email policy by filtering out specific content and attachments in messages *leaving* your corporate network.

Sophisticated end-user and administrator quarantine management – Global Tenant's safe, external quarantine and email-based quarantine reporting process significantly reduces email administration and false positives (legitimate email misidentified as spam).

Additional service features

One of the industry's most comprehensive email defense solutions, this package also includes support and services to help you keep your overall email network reliable and running efficiently. With this package, you'll also benefit from:

Global Tenant Fail Safe Disaster Recovery Service – Incorporates complete back-up protection for your email server in case of an unforeseeable outage or malfunction, or during planned maintenance.

Automated, around-the-clock email monitoring and protection – Global Tenant's Threat Center is a sophisticated streaming data environment where Global Tenant monitors the global state of email communication, 24 hours a day, seven days a week, and provides its customers with real-time updates and protection.

Centralized, policy-based administration – Enables your organization to easily configure and manage email protection and filtering for all your email servers using one centralized web-based tool.

Account provisioning and configuration support – The Global Tenant Provisioning team will work with you to activate and configure your account.

Dedicated customer service – The Global Tenant Customer Service team is available to answer your account and billing questions via a toll-free phone number from 8 a.m. to 5 p.m. Central Time, Monday through Friday, or anytime via online eService. If your request is received outside of these hours, a service representative will contact you the next business day.

Around-the-clock technical support – The Global Tenant Technical Support team is available to answer your technical questions via a toll-free phone number from 8 a.m. to 5 p.m. Central Time, Monday through Friday, or anytime via online eService. Technical support is available outside of business hours for service-debilitating issues.
